Contract for Cooperative Program
Leading to a Liberal Arts Degree and to a Master of Architecture Degree

This contract concerns
Your college and
The School of Architecture, Washington University

Washington University offers the opportunity for students enrolled in the Cooperative Program to complete three years of college at a liberal arts institution studying non-architectural subjects. Then, during their fourth year they begin their architectural studies at Washington University while simultaneously meeting the requirements for graduation at their undergraduate school. Pending approval to continue architectural studies after the year at Washington University, enrollment as a graduate architecture student commences in the Master of Architecture program.

The Cooperative Program allows a student to pursue a liberal arts education and also to gain an early start on their graduate professional education in architecture. By taking advantage of the overlap between the two components of the program, students can reduce what would otherwise be a 7 1/2 year time commitment to 7 years.

* * * * *

The major parts of this Cooperative Program are outlined below. For further details interested students should consult with each of the colleges.

A. A student interested in this program constructs during their three undergraduate years a program which meets the academic goals and specific requirements for graduation at Your College. During this time, in preparation for architectural studies at Washington University, the student should complete the following courses:
   1. One semester of Math/Calculus
   2. One semester of Physics
   3. Two semesters of History of Western Civilization or the equivalent
   4. A four-semester studio sequence in introductory design including exercises in the design process, drawing, graphics, color, materials, scale, etc.

B. By February 1 of their junior year the student submits to the School of Architecture an "Intention to Transfer Form." This form is accompanied by a transcript, a portfolio representing the student's work in item 4 above, and letters of recommendation from at least three college instructors. An application fee will not be required.

By May 1, a response is sent to the student regarding their intention to enroll in the Washington University component of the Cooperative Program.

Sequence of enrollment:
- Your College for freshman, sophomore, and junior years
- Washington for senior year and graduate studies
C. The student spends his/her senior year at the 300 level at Washington University taking the following courses:

<table>
<thead>
<tr>
<th>Fall Semester</th>
<th>Spring Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arch 311 Design 6 units</td>
<td>Arch 312 Design 6 units</td>
</tr>
<tr>
<td>Arch 339 Concepts 3 units</td>
<td>Arch 346 Bldg. Systems 3 units</td>
</tr>
<tr>
<td>Arch 323A Representation 3 units</td>
<td>Arch 323B Representation 3 units</td>
</tr>
<tr>
<td>Archt. History 3 units</td>
<td>Archt. History or Elective 3 units</td>
</tr>
<tr>
<td>15 units</td>
<td>15 units</td>
</tr>
</tbody>
</table>

Arch 311 and 312 are architectural design studios, Arch 339 (Concepts and Principles) is a theory and principles of architecture course, and the Arch 323A/B sequence provides instruction in architectural representation techniques. The full-time schedule of courses includes 15 units of credit each semester.

D. Graduation from your college occurs after credit is transferred from the undergraduate year of study at Washington University.

E. In the spring semester of the senior year at Washington University the student will be asked to submit an application for continuation to the final three years at the graduate level. In addition to submitting the appropriate forms, the student must be prepared to present his/her architectural design work for review by the Graduate Admissions Committee. Then, pending approval of the Committee and completion of the undergraduate degree, enrollment status as a graduate architectural student at Washington University becomes effective.

A three-year graduate course of study (90 units including six design studios - Arch 411-412, Arch 511-512, Arch 611-616) commences at this point leading to the M.Arch. degree. One of the required architectural design studios may be taken during the summer at the advanced (500/600) level.

This agreement shall be effective from July 1, 2005 forward. It shall be automatically renewed unless either participating party makes notification at least 90 days prior to the beginning of the academic year at your college.
